REVISED Scope of Service and Cost Proposal for the
PY 2022 CDBG Resurfacing of Laurel Street
M2023-014R**

Dear Mr. Mayes:

REMINGTON & VERNICK ENGINEERS (RVE) is pleased to provide the following scope of services and associated cost proposal for the engineering, design, bid documents/specifications, and bidding/advertisement services for the resurfacing of Laurel Street (from Scotland Road (CR 638) to Lincoln Avenue)

The following three (3) phased approach will be utilized for the professional services associated with the project.

PHASE I: TOPOGRAPHIC SURVEY & BASE PLAN PREPARATION

RVE will prepare base plans utilizing field and topographic survey data. Our staff will perform all necessary field and topographic surveying tasks to accurately locate and identify all existing features along Laurel Street within the project limits.

All field survey information will be obtained by collecting existing data utilizing an electronic total station instrument. Cross-sectional information will be obtained at fifty-foot (50') intervals to adequately locate, describe, and obtain the vertical and horizontal characteristics for design purposes. This information will include:

- Top of curb, edge of pavement/gutter, sidewalk, and driveways.
- Storm inlet grates, manhole rims, sewer main vents and gas valve boxes. Inverts and as-built information will be obtained for any storm sewer systems that are visible.
- Above-ground utilities.
- Water main valve box and curb stop locations
- Street lights, signs, fences, mailboxes, and any other structure or feature within the right-of-ways.
- Location of all existing trees and shrubs within the right-of-ways.
- A survey baseline, horizontal and vertical control information will be established in the field, and included in the plans.

Base maps with plan and profile views will be prepared in Auto-Cad at a scale of 1" = 30'.

PHASE II: PRELIMINARY ENGINEERING & DESIGN

This phase of the project will consist of the preparation and development of the proposed improvements, plans, specifications, bid documents, and engineer's estimate of cost to a point that will be approximately 95% complete.

Utility Organization/Agency Coordination

RVE will submit the base plan to local utilities to confirm the approximate location and type of all above and below ground utilities within the project limits. Additionally, the respective utilities will be notified of the City's intent to improve the road, and that they should check their proposed capital improvements or maintenance operation schedule to avoid disturbance of the area after the project is constructed.

RVE will coordinate with Federal, State, County, or Local Agencies that may need to be notified of the proposed improvements in which coordination/notification will be required.

Pavement Coring Services

RVE will perform pavement coring for the roadway to determine the existing thickness of the roadway to assist with pavement design.

Engineering & Design Standards

All designs will be in conformance with current standards.

Bid Documents & Specifications

RVE will provide all documents necessary for bidding in accordance with the standards of the City, utilizing the current NJDOT Standard Specifications for Road and Bridge Construction, with current supplemental specifications will be used.

A detailed Engineer's Estimate of the cost for the project will be prepared and provided.

Plan Format/Layout

In general, the plans for the project may consist of the following pages:

- Title Page with Project Location Map.
- Standard Legend, General Notes & Estimate of Quantities.
- Construction Plan Sheet(s).
- Traffic Control Plan and Details.
- Construction Details.

Project Coordination with the City

RVE anticipates at least two (2) meetings in some instances for the purposes of project coordination, obtaining input, and design improvement comments.

Additionally, RVE will submit second utility notification and accompanying plans of the improvements to the utility organizations. This will give the utility organizations a second opportunity to check their proposed capital improvement plans or maintenance operation schedule to avoid disturbance of the site after construction.

Upon receipt of all comments from the City, RVE will make minor revisions to the plans, specifications, and bid documents as reasonably necessary and/or required.

PHASE III: FINAL DESIGN & ADVERTISEMENT/BIDDING SUPPORT

This phase consists of the incorporation of all minor comments and recommendations received from the Preliminary Engineering & Design Phase. The following tasks will be performed:

- Provide fifteen (15) sets of contract documents for bid purposes.
- Perform all work necessary to coordinate advertisement and bid receipt date with the City.
- Answer and respond to all prospective bidder questions during the advertisement period.
- Prepare written clarification and/or issue formal addendums as necessary.
- Attendance at bid opening, review bid submissions, prepare bid tabulation, and prepare recommendations to award.

SPECIFIC EXCLUSIONS

The following work items are specifically excluded:

- Preparation of applications for review/regulatory agencies not specifically indicated.
- Application fees for review and/or permits from regulatory agencies.
- Right-of-way acquisition & construction easement documents.
- Testing of construction materials.
- Contract administration & construction observation services

If unforeseen and/or unanticipated work items arise, our office can provide a separate scope of services & cost proposal for consideration and approval by the City.
